PERFORMANCE EVALUATION TOOL – REQUIREMENT DOCUMENT

1. Introduction

The purpose of this document is to define the requirements for developing a **Performance Evaluation Tool** that will allow managers and HR to evaluate employee performance based on predefined **Key Performance Indicators (KPIs)** for each team.

The system will provide transparency to employees by allowing them to view their performance scores assigned by their line manager and HR.

2. Objectives

The main objectives of this tool are:

- To standardize employee performance evaluations across departments.
- To evaluate employees based on predefined KPIs.
- To track performance quarterly.
- To allow both **Line Managers** and **HR** to provide evaluation scores.
- To provide visibility to employees regarding their performance scores.
- To maintain a transparent and structured evaluation system.

3. Teams and KPIs

Each **team/department** will have its own set of **KPIs**.

Examples of teams may include:

- Development
- QA
- DevOps
- Application Support
- HR
- Sales

The **KPIs for each team will be provided separately** and will be configured in the system.

Each KPI will have a scoring mechanism based on quarterly performance.

4. Evaluation Cycle

The performance evaluation will be conducted **quarterly**.

There will be **4 quarters in a year**:

- Q1
- Q2
- Q3
- Q4

Each quarter will have a **maximum of 25 marks**.

5. Scoring Structure

Total Marks Per Quarter: 25

Evaluator	**Maximum Marks**
Line Manager	20 Marks
HR	5 Marks
Total	**25 Marks**

Explanation

Line Manager Evaluation (20 Marks)

- The Line Manager will evaluate employees based on **team-specific KPIs**.
- Each KPI will have an assigned score.
- The total manager evaluation score cannot exceed **20 marks per quarter**.

HR Evaluation (5 Marks)

- HR will provide an additional evaluation score.
- This score will focus on areas such as:

    - Professional behavior
    - Attendance
    - Compliance with company policies
    - Organizational contribution

The HR score cannot exceed **5 marks per quarter**.

6. User Roles and Permissions

The system will have three main user roles:

6.1 Admin (Optional – if implemented)

Responsibilities:

- Configure teams
- Add/edit KPIs
- Manage users
- Generate reports

6.2 Line Manager

The Line Manager will be responsible for:

- Evaluating team members.
- Assigning scores against each KPI.
- Providing quarterly performance scores (maximum 20 marks).
- Viewing performance history of their team members.

Permissions:

- Can evaluate **only their direct team members**.
- Can edit scores before final submission.

6.3 HR

The HR team will be responsible for:

- Assigning **HR evaluation score (5 marks)**.
- Monitoring evaluation completion.
- Reviewing evaluation results.
- Generating reports for management.

Permissions:

- Can view all employees.
- Can assign **HR evaluation score**.
- Can generate reports.

6.4 Employee / Team Member

Employees should have visibility into their evaluation.

Permissions:

- View their **KPIs**.
- View scores assigned by **Line Manager**.
- View **HR evaluation score**.
- View quarterly performance summary.

Employees **cannot edit or change scores**.

7. Evaluation Workflow

Step 1 – KPI Setup

- KPIs for each team will be added to the system.

Step 2 – Quarter Begins

- Employees are assigned to their teams.

Step 3 – Manager Evaluation

- The Line Manager logs into the system.

- The manager assigns scores against each KPI.
- Total score must not exceed **20 marks**.

Step 4 – HR Evaluation

- HR logs into the system.
- HR assigns **up to 5 marks**.

Step 5 – Final Score

The final quarterly score is calculated automatically:

Final Score = Manager Score + HR Score

Maximum possible score per quarter = **25**

8. Score Visibility

Employees should be able to view:

- Their **KPIs**
- **Manager evaluation scores**
- **HR evaluation score**
- **Total quarterly score**
- **Historical performance (previous quarters)**

Managers and HR will have access to detailed evaluation dashboards.

9. Dashboard Requirements

Manager Dashboard

Should display:

- List of team members
- Evaluation status
- KPI scoring form
- Quarterly performance summary

HR Dashboard

Should display:

- All employees
- HR scoring section
- Evaluation completion tracking
- Performance reports

Employee Dashboard

Should display:

- Assigned KPIs
- Manager scores
- HR scores
- Total performance score
- Performance history

10. Reports

The system should generate reports such as:

- Quarterly performance reports
- Team performance summary
- Individual employee performance
- Department performance analysis

Reports should be exportable in:

- Excel
- PDF

11. Technical Requirements (Suggested)

The tool can be developed as a **web-based application**.

Suggested features:

- Secure login system
- Role-based access control
- Database for storing KPIs and scores
- Dashboard-based interface
- Exportable reports

12. Future Enhancements (Optional)

Possible future features may include:

- Automated reminders for evaluations
- Performance trend graphs
- Integration with HRMS
- Goal setting for employees
- Manager comments and feedback

12. Surveys & Announcements Module

12.1 Company Announcements

- HR can post important company-wide announcements on the portal
- Announcements should be visible to all employees
- Employees can view announcements from their dashboard

12.2 Survey Management

HR will be responsible for creating and managing surveys.

Survey Types:

1. **Anonymous Surveys**

    - Employee identity will be hidden
    - Responses cannot be traced back to individuals
    - Used for honest feedback
2. **Non-Anonymous Surveys**
    - Employee identity will be visible
    - Used for formal or trackable responses

Survey Features:

- Employees can fill and submit surveys on portal
- HR and Management can view survey results
- Results should be presented in a clear and structured format (charts/reports)
- Management should have a clear overall picture of employee feedback

- Goal setting for employees
- Manager comments and feedback
- Survey analytics with advanced insights
